

Premier-roll

Remote Control Insulated Rolling Garage Door

Security low level external over-ride, for applications where garage access during a power failure is unavailable. The unit allows the garage door emergency over-ride to be accessed from the exterior of the garage, at a height to suit your needs.

Multiple garage doors can be controlled from a single keyfob. Available in up to four channel.

Lighting controller allows the integration of any lighting and other powered products. Timings are variable at the touch of a button from your keyfob.

Optional Accessories

Glazed vision panels are available to allow light to pass into your garage. The profiles are complete with clear glazing and colour coded to match the door curtain.

Foil Colour Finishes are supplied with Brown coloured vision slat

Optional full box cover is available to totally enclose the rolling mechanism of the door. Made from coated aluminium with standard colours of white & brown. Optional coloured boxes are available to match curtain colour selections.

Wall mounted wireless digital keypad, with up to six digit security codes, allowing full door operation from any button.

WM Shutters Ltd are the leading UK manufacturer of Insulated rolling garage doors. Established since 1998 in Telford Shropshire and manufacturing from their state of the art 78,000 sq ft factory, WM Shutters Ltd are the only UK manufacturer of Insulated garage door profile, ensuring the highest quality and performance

Premier-roll insulated garage door sections are manufactured using state of the art machinery unique to the UK. Premier-roll offers a combination of twin wall security and strength with reduced heat loss from your home. Premier-roll profile is environmentally efficient due to the unique through section insulation value of 1.5 W/m²K.

The Aluminium used is pre-colored ensuring colour consistency with an Additional anti scratch film applied, giving a fully protected harder wearing finish.

Standard Colour finishes carry a 5 Year guarantee as standard

Colour Finish Options

Premier-roll Comes with a choice of fifteen standard colours in a hard wearing baked enamel coating.

			Optional Foil Colour Finishes		

Simulated textured finishes identical to the latest advancements in UPVC window manufacture. Utilizing the same Renolit foiling process, the textured finish is very hard wearing and comes with a limited 10 year guarantee.

Warranty

Premier-roll products carry a standard 5-year manufacturers warranty covering the Somfy Motor Unit & Wall Mounted Receiver. This guarantee is non transferable. The purchaser of the goods is eligible for a conditional manufacturers extended 10-year warranty covering safe and reliable operation of your Premier-roll garage door from the date of purchase. The extended warranty is based on a trained installer service and inspection on an annual basis. (details of a yearly service must be registered on the guarantee documentation)

Inline with ISO 9002 Premier-roll garage doors carry a unique serial number, located on a silver CE approved badge attached to the inside of the Premier-roll head plate system. All warranty claims must be lodged with the installer using the door unique serial number as the point of reference. Component parts will be replaced free of charge and sent back to the relevant component manufacturer for inspection. Any returned parts deemed by the manufacturer to be outside of the warranty due to misuse, will lead to the replacement parts being invoiced.

WM Shutters Ltd as a progressive company reserve the right to update or modify Premier-roll without prior consultation. All colour samples depicted in this brochure are as close to the original manufacture colour as possible, Premier-roll doors supplied may vary in colour from the brochure representation

Have You Suffered From These Problems!!

Arriving home, you know it will be raining, you have to get out of your car with your keys to unlock the garage door. Its too easy to park too close to the out-swinging traditional door, which means you have to re-position the car to allow the garage door to open, whilst still getting wet.

Having maneuvered your car gently into the garage, ensuring you don't damage the wing mirrors on the old rotten protruding garage door frame, you have to lock the garage door from the outside even if you have an integral connecting door.

“There is a Better Way”

Premier-roll Made to measure insulated roller garage doors give space saving vertical operation which releases much needed storage space in the garage roof area and enables you to park as close as possible to the door when closed. Additional width is also achieved as their no need for an intrusive frame. With exceptional heat saving and acoustic properties the UK manufactured twin wall insulated Aluminium interlocking sections offer great benefits in security, strength with additional home insulation. Every Premier-roll is fully CE compliant and carries a unique serial number for continued product support during the working life of the product.

Premier-roll Garage doors are fully automated, opening at a push of a button from the warmth and safety of your vehicle. Premier-roll can be installed internally or externally giving exceptional flexibility of design

Premier-roll In Depth

Premier-roll is designed to give quiet reliable operation throughout the product life span. All components used in the Manufacture are tested and approved

An Integral Somfy tubular motor unit with emergency manual over-ride facility to allow the door to be operated in the event of a main power failure. Somfy tubular motors have full five year manufacturers guarantee.

High security remote control with fully encrypted Keelock technology, ensuring every garage door has its own unique code. Keelock technology ensures that the code on your garage door cannot be copied or cloned.

- 1 Every Remote unit comes complete with two keyfob transmitters with a single button for ease of operation.

High Security segmented locking system utilising the motor braking force driving the curtain firmly Down into the closed position. The locking system works on uneven and a graduated garage door floors.

Premier-roll has a heavy duty 90mm x 35mm guide section as standard, with a reduced 75mm x 35mm available for narrow applications. The guide section incorporates Two luxurious pile in-fills which sandwich the door sections giving a positive draft free seal, helping reduce heat loss from your home.

An extended 150mm x 42mm guide is available for extra large doors positioned in very open areas.

A choice of safety system is available to suit every application.

Bottom Seal Contact Strip, uses wireless technology to instantly stop and return the garage door back to the fully open position on contact with any obstacle.
Photo Electric Beam, transmits a polarised invisible light beam across the garage door, and when the beam is broken returns the door to the fully open position.

Note: Both systems can be installed on the same application upon request

- 2 The receiver unit has an on-built courtesy light which stays illuminated for a period of three minutes after the door has been operated, giving time to navigate through the garage when in darkness.
- 3 To cover every eventuality the remote unit has a set of spare fuses under the base cover.
- 4 A 60DB NACOS approved, alarm unit is available, which can be easily linked direct to your home alarm system.
- 5 An internal button on the wall mounted receiver unit, enables full control of the garage door from inside the garage.

To further enhance security the bottom rail section on the garage door is fully reinforced against forced entry or damage. The bottom seal is a two pocket single extrusion manufactured from a unique memory based silicon-enhanced rubber, which won't be compressed or lose its shape after repetitive operations. The rubber gives a weatherproof seal.
